Cucumber

SC51221

Parthenocarpic cucumber, vigorous plant growth, suitable for spring & summer seasons, medium to small size dark green leaf, multifruit 3 fruits per node, short internode, dark green high uniformity fruit 15-14 cm in length. Tolerance to (IR) PM, DM (HR) ZYMV, CMV, CVYV, CYSDV.

SC51222

Parthenocarpic cucumber, vigorous plant growth, suitable for summer season, medium size dark green leaf, multifruit 3 fruits per node, shiny green high uniformity fruit 15-14 cm in length.

Tolerance to (IR) PM, DM (HR) ZYMV, CMV, CVYV, CYSDV.

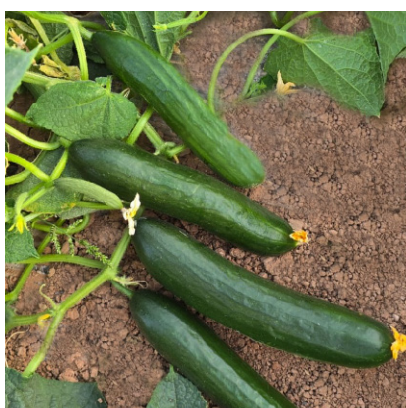

SC51123

Parthenocarpic cucumber, vigorous plant growth, suitable for winter autumn seasons, medium size dark green leaf, Single fruit with branch, deep shiny green high uniformity fruit 17-16 cm in length.

Tolerance to (IR) PM, DM (HR) ZYMV, CMV, CVYV, CYSDV.

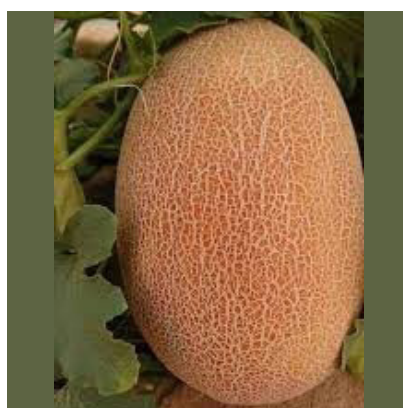

Cucumber

SC51124

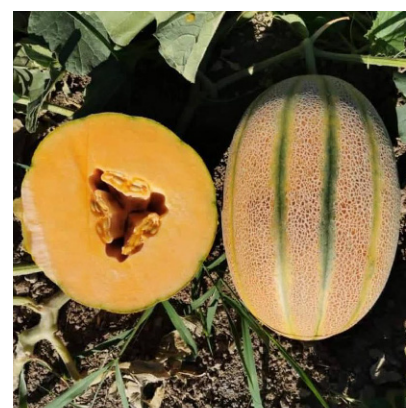

pen field cucumber, all female flowers, strong vigorous plant growth, suitable for spring summer seasons, medium size dark green leaf, semi-multi fruit with good branch, deep shiny green high uniformity fruit 18-16 cm in length, high production Tolerance to (IR) PM, ZYMV, CMV, CVYV.

Melon

SM52225

Orange flesh, vigorous plant growth, Oblong-elongated fruit shape, 4-3 kg weight, high netting, yellow fruit cortex, very good taste and flavor. Tolerance to F0, F1, F2, PM.

SM52226

Ananas, Charente strong high covering plant, early production, oval fruit shape, fruit weight 4-3 kg., high firmness, no cracking, high cavity, high uniformity, jointed when mature very good taste and flavor. Tolerance to F0, F1, F2, PM.

Watermelon

SW53227

Hybrid Crimson sweet, vigorous plant growth, Blocky fruit shape, fruit weight 15 kg. high uniformity, 20 mm rind thickness, good flesh color and firmness, good sugar content.

SW53228

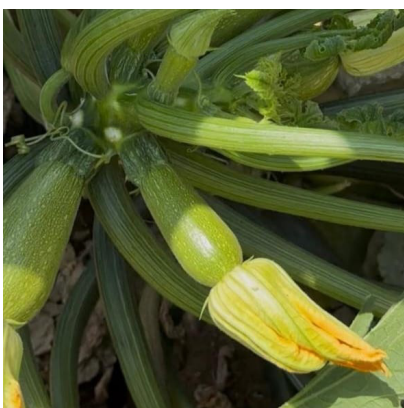

Crimson sweet type at open field, Round shape with 15-12 kg weight, Deep red flesh color with small seeds (IR) PM, F2

SW53229

Sugar Baby type at open field, Round shape with 9-7 kg weight, Deep red flesh color with small seeds (IR) PM, F2

Squash

SS542210

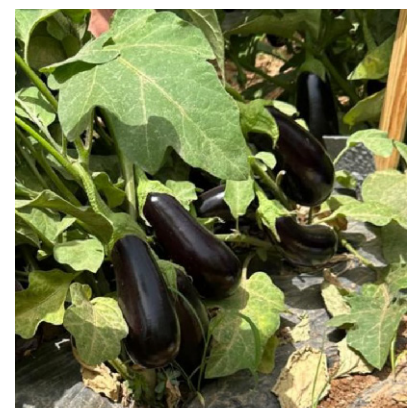

Anita open field & greenhouse, strong plant growth, medium leaf size, spring and summer season, good fruit set, maturity in about 38 days, bulbous fruit shape, light shiny green fruit color, high uniformity, (14-13), tolerance to (IR) PM, WMV, ZYMV, SLCV.

SS542211

Anita open field & greenhouse, strong compact plant growth, large leaf size, winter and spring season, good fruit set, maturity in about 38 days, bulbous fruit shape, light shiny green fruit color, high uniformity, (14-13), tolerance to (IR) PM, WMV, ZYMV, SLCV.

Eggplant

SE572218

Classic for greenhouse and open field Deep shiny dark black color fruit, obovate with green calyx shape, 300-250 gm average weight: Pure white Flesh without seeds (IR) TMV

Tomato

ST552212

Determinate open field, Strong Vigorous plant, Deep bright red color, round to globe shape, Average fruit weight 250-200 grams Tolerance (IR) TYLCV, V, F1, F2

ST552213

Indeterminate greenhouse Strong Vigorous plant, Deep bright red color, round to globe fruit shape, Average fruit weight 160-140 grams Tolerance (IR) TYLCV, TSWV, TMV, V, F1, F2

Corn

SZ592221

Super Sweet corn 70 days to mature early to mid-early ,2-1 Meter Heigh, 2 ears on branch.

Pepper

SP562214

Cayenne hot pepper type green house and open field, strong high covering plant, around year season tolerant to high temperature, early productive, very good fruit set style, cylinder conical fruit shaping, high uniformity, long shelf life, deep shine green color turn to red upon maturity, 2.5*18cm fruit dimension, high pungency, tolerance to PM, TMV, CMV.

SP562215

Heirloom hot pepper type for greenhouse and open, field, strong Vigorous compact plant , Green to red fruit at maturity, 4 lobes, elongated and conical in shape with 15-10 cm fruit length (IR) TMV, TMV, PVYO, TSWV, PM

SP562216

Blocky bell sweet pepper for greenhouse and open field, Strong Vigorous compact plant, high production, Red color fruit, blocky 4 lobes shape, 8x9 cm fruit dimension, 230 g weight (IR) Resistance to: ToMV, TMV, PVYO

Pepper

SP562217

Marconi pepper for greenhouse and open field, strong plant cover, early maturity, fruit length 25-20 cm ,5 cm in width (IR) Resistance to: TSWV, CMV, PM

Brassica

SB581219

Cauliflower Open field, Winter - autumn season, Compact head Strong Vigorous plant Fruit weight 4-3 kg

SB581220

Cabbage Open field, winter - autumn season, Oval Compact head, Strong Vigorous plant, Fruit weight 4-3 kg
